% Impervious 53%

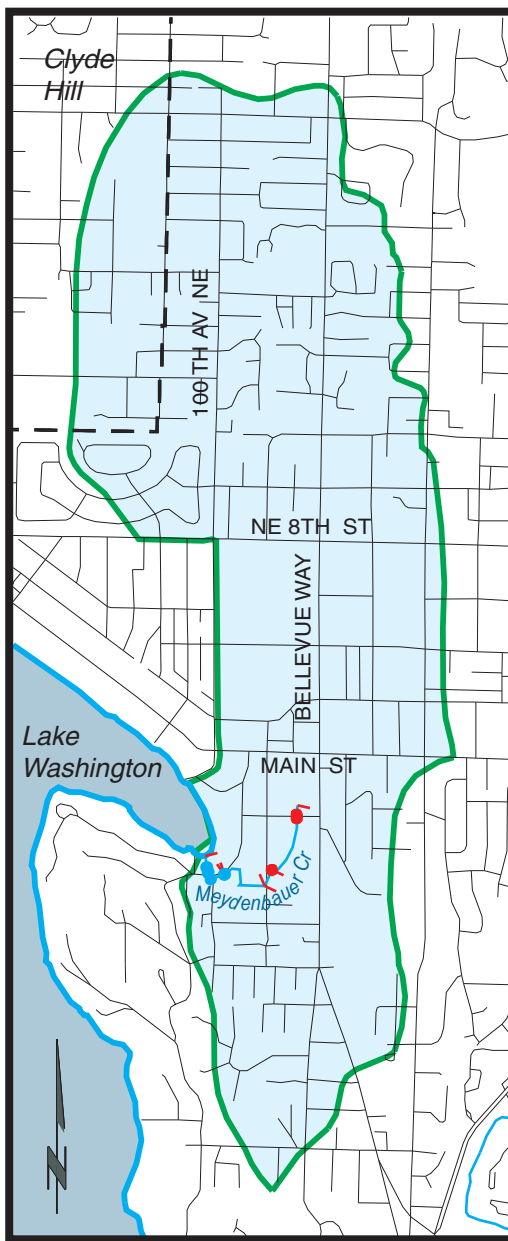

Basin Relief 184ft

Basin Energy 0.3

Basin Length 2.2 mi

Average Basin Width 0.7mi

Total Length of Open Channel 1,718 ft

Fish Use: Lower Meydenbauer Creek (08-0258) is a fish-bearing stream. The historical record mentions local residents fishing for trout and salmon (McDonald 1984). The stream likely supported both resident and migratory cutthroat trout; the salmon mentioned in local histories were likely coho. Adult sockeye salmon, cutthroat trout, scalpin and stickleback have been noted in Meydenbauer Creek downstream of 101st AVE SE in both 2000 and 2001.
